# WESTERN BEECH RECLAIMED FROM THE DEPTHS OF LAKE PIEMAN

Below the waters of Lake Pieman on Tasmania's west coast lies a treasure hidden for over 25 years. An ancient forest lost to the deep, dark waters. Lost, that is, until today.

Hydrowood has teamed up with Oakdale Industries to bring exquisite western beech flooring and panelling products to you. This isn't recycled wood already used and full of rusty bolts and nails. It is solid timber reclaimed from hydro lakes that comes unblemished and intact. Beautifully finished by Tasmanian timber manufacturer, Oakdale Industries, you're also supporting a social enterprise that trains and employs people with disability.

Stylish flooring, sustainably sourced and socially responsible.

## FEATURES

Common names	Western Beech, Myrtle Beech, Tasmanian Myrtle, Australian Cherry.
Botanical Name	Nothofagus cunninghamii
Grain	Straight, fine and even; occasionally wavy fiddleback pattern.
